

**Peace & Conflict Planners was formed in 2000. It was developed by Armour Development, a large-scale land development and Real Estate company with over 40 years of successful experience.** Armour Development has transacted over 1 billion dollars of business and pioneered culture and economic development projects, such as exceptional residential complexes, shopping courts, industrial parks, and recreational centres. We helped transition Markham Ontario into an economic powerhouse, which provided Peace & Conflict Planners with our foundational knowledge and praxis.

**Peace & Conflict Planners leads a global consortium of reconstruction and economic acceleration experts.** We have deep expertise in economic development and acceleration, international affairs, information and communication technologies, humanitarianism, social sciences, defence and security, and strategic business development.

We are client-driven. Peace & Conflict Planners apply international best practices through R, D&I, analysis, planning, implementation, project management, and evaluation to improve the results of client projects – and this translates into increasing Client profitability. Our clients have access to our multi-dimensional strategic alliances and partnership opportunities. Peace & Conflict Planners is a smart and nimble boutique company able to respond to the 21<sup>st</sup> century business environment.

**We adapt to our client projects through virtual collaboration and a cutting-edge innovations ecosystem.**

8. ICT products and services for start-up and growth companies

Our mission is to improve the quality of life for people in Canada and abroad through cultural and economic development. Our products and services support sustainable outcomes for people and businesses affected by economic and cultural challenges and major community transitions.

Our successful business incubator projects – The Company Factory™, Identigenesis™ - identifies Peace & Conflict Planners as a leading public and private sector economic solution. We specialize in building businesses and technologies that are independent of economic downturns and *du jour* government funding. We are unique in our approach to economic development because we link business development and investment to local economic acceleration through our systemized approach.

Since 2000, we have specialized in new-use technology research, innovations and development in the area of cultural and economic acceleration. Peace & Conflict Planners uses contemporary business practices such as web 2.0 social media networks, crowd sourcing, network intelligence, and governance 2.0 frameworks. We assist our clients to transition towards using these models.
